TERRACE GARDEN

HORTUS CONCLUSUS

The stone figure welcomes the visitor in a friendly way and points to the drinking and washing fountain with bamboo cane inlet as a call to clean the stress of everyday life.

TERRACE GARDEN

HORTUS CONCLUSUS

Embedded in the existing environment on the southern slope above Lake Lucerne lies this gem with a fantastic view. Many a resort would be envious of this location. Over a period of about 20 years in total, the landscape architects planned this environment on behalf of the client and executed it in several stages, adapting it to new needs. Thanks to a cooperative partnership, the now visible, very personal ambience was created in a composition of Asian and Mediterranean design elements. Giardino Secreto, meditation, as well as thoughts of Feng-Shui and Tao philosophy were integrated and implemented in the concept. The desired privacy with protection from unwanted views has been optimally achieved thanks to the choice and locations of the planting. A fully automatic irrigation system ensures vital plants even during dry periods. However, the garden presents itself as a treasure not only during the day. Also during the darkness one feels by the sensitively selected light types and locations in a discreetly illuminated paradise.
